The Player

The Amiga began life primarily as a games machine and that's what it's still best known as. Nowhere else can you find such a rich variety of games. Over the following pages, we're going to be taking a look at some of the best Amiga games on offer and giving our expert opinion about which titles represent the best buys...

80 FIRST

Welcome to the second Amiga Guide, from the December issue of C&A Amiga. Over the coming months, Amiga Guide will cover every aspect of the Amiga, from programming, graphics and animation to music, video and desktop publishing. Each issue magazine will cover a different topic, building up into one of the most complete guides to the Amiga ever published.

Last month we took a look at public domain software. This month it's the turn of Amiga games and next month we'll be presenting a 20-page Beginner's Guide. And all at no extra cost! It's hoped that you'll enjoy these guides and get a lot out of them. Initial reaction to the first guide has been incredibly favourable, but if you've any suggestions/requests/feedback, then please drop me a line at the editorial address.

Alan Langley, Editor

GAMES PEOPLE PLAY

Quality is a relative concept. What's one man's treasure is another's poison. And nowhere is this more true than in the great world of Amiga games software. Take *Disc Devils*, *Gun Off 2*, for instance. Many people consider it to be the best football game ever to grace a home computer, whereas others find it almost unplayable and grieve the simplicity of, say, *Goalkeeper Decision*. Then there are other alternatives such as *Blitzer* and *Mini Mr Gunpoint*...

What I'm trying to get at is that everyone has an opinion and it's very rare indeed to find two people whose tastes exactly coincide. And that's been the problem we've had when compiling this special games guide. It was almost impossible to agree on any form of top 100 guide, so we decided to take a more sensible route and take a look at specific game genres. We've chosen what we consider to be the top five games from each category as well as some of the also-rans. We're not claiming that these lists are comprehensive. They're not meant to be. But hopefully, they'll point you in the right direction if you're thinking of testing the waters in any particular category. After all, with the average game costing £20, buying a full game can be an expensive mistake.

4 ADVENTURE GAMES

Adventure games were catapulted into a completely new dimension when the first graphic adventure made its debut. Today, adventure games are one of the top selling genres with no less of Monkey Island, Another World and the Ultima series leading their ranks.

6 PLATFORM GAMES

Playing from one platform to another might not sound like a recipe for a staggering success in games, but there is no doubting the sheer volume of some of the top games in this genre.

8 SHOOTING GAMES

Everyone loves a good kickabout and the Amiga is blessed with three of the best in the form of Kick Off 2, Strike and Ultimate Soccer. Which do we rate the best, find out on page nine.

10 SHOOT 'EM UPS

Ever since Space Invaders made its debut all those years ago, shoot 'em ups have been a staple diet of any gamer's collection. How many people that ever, the choice is staggering.

12 ISLAND 'EM UPS

There's nothing like a lot of mindless violence to relieve the stresses of everyday life. Although the genre has been a bit quiet of late, there's still plenty of quality titles available to help you stay fit.

14 THE RACE GAME

A classic, there is one way of selling a game, even if the actual gameplay is a load of dog's bollocks. Despite this reputation there have been a few notable games that have bucked the trend.

16 ROLE-PLAYING GAMES

Changing around a load of dimes in dungeons with a group of blood-thirsty adventurers (showering dozens of demons, bats and various monsters doesn't sound like my idea of fun, but Role-Playing games are an interesting counter). Find out which ones we consider to be essential purchases on page sixteen.

18 GOD GAMES

If you've always wanted to become supreme ruler of all that you survey, then meet your chance. God aims to let you take control of an entire city, country or even planet in pursuit of your megalomaniac.

20 ARCADE CONVERSIONS

From Asteroid Island to Street Fighter 2, the Amiga has played host to some of the best coin-up conversions of any machine. Check out which ones we consider make the grade.

22 STRATEGY GAMES

From empires broken in the cerebral world of strategy games. Whether it's creating a planet, building a railway company up from scratch or planning up trouble in far away countries, there's surely something of interest here for everyone.

24 MILITARY GAMES

If you've always wanted to dress up in tight flight suits, wear knee high leather boots and growl away about the jaws, here's your chance to do so: review the best military titles available.

26 FEAR GAMES

It's your idea against the most advanced computer opponents known to man as your smelly attempt to blow away the opposition before they blow away you.

28 FIGHTING GAMES

A deadly array of some of the world's top fighters are at your disposal when you load up some of the impressive fight sims available for the Amiga.

30 SPORTS

Sports sims are one of the oldest game genres and offer the player the chance to try their hand at anything from squash and baseball to golf and deadly future sports.

32 BUDGET RELEASES

If money is too tight to mention, then why not try some of the excellent budget releases that often cost less than a pepper?

ADVENTURE GAMES

Adventure games still have a slight spectacle and surreal image, which is completely inaccurate. The last few years have seen a revolution in controls and graphics, and now some of the best Amiga games fall into this category. No longer a load of old baggage, check out some of the largest, most taxing and humorous games around.

Monkey 1 is still really enjoyable, as is getting Monkey 2 out of monkey's clothing.

THE SECRET OF MONKEY ISLAND 2 US Gold £34.99

Let's once follow up to the award-winning Secret Of Monkey Island. LucasArts have introduced an improved control system, more jokes and many of the usual that made the first game such a hit.

The plot is superb. No longer can the hero (Guybrush) rescue and win hands with tales about how he defeated pirate LeChuck, as he gets lost in a new quest. The first part of the game starts with flashbacks, as Guybrush is left barely hanging around. This is a little

ANOTHER WORLD US Gold £35.99

It's hard to define this game exactly, so we've classified it as an arcade-adventure.

It starts with you falling at the controls of your particle accelerator, so you do after a hard day's work. You hit the button to run the test that what happens? The button gets stuck to lightning. That, coupled with the experiment, transports you to another planet. This should have acted for a long night or two or three.

The game is completely point-and-click, although you don't get much time to control. You start off under attack, and when you're asked how to swim you find yourself on a swimmy desolate planet, with only a few things that are useful for swimming. That is until you find the large black fish-like beast. It's a surprise to it is the most basic on the agenda. This serves as a good introduction to the game and the game's required throughout.

What makes this game really special are the graphics. They look like a combination of traditional games and programs, which gives the game a nice feel. Every time a major event occurs you're treated to a short animated sequence which really enhances the atmosphere.

Another World suffers from being a little easy to complete, but the overall effect of the game is so spectacular that it's worth playing over and over again.

discovering, as you're actually playing the game, go to the next 10 steps, so to speak, as you have to get into the situation.

But apart from all this, what really makes this game special is the humor. Throughout you come across characters who are not to forget your day, sometimes with words.

The control system is particularly easy to get to grips with. To move Guybrush you simply point and click on where you want him to go, then he'll go to get there. There's a lot of commands at the bottom of the screen that can be highlighted then tapped to an item or character. Commanding is also made easy.

To respond to a character you simply select one of the phrases that appear in the dialogue window. Usually there's one key phrase statement that will start you by the information you to offer. You're always tempted to select the wrong option to see what will happen.

For those bits of this game is Rude and the 11 days it comes on. It's not a secret, though, there's actually very little that's missing involved.

One of the best and, without a doubt, the best Amiga adventure game.

FUTURE WARS ▲

US Gold £25.99

The forerunner to *Another World* has the same set of place-hunt-jobs, although this time you play a 21st

century scientist-bearer sent back to medieval times. Once there you find out that the daughter of a local duke has been kidnapped and that there is a substantial reward for anyone who can rescue her. Being a movie-type you take on this challenge.

Successful in that and you encounter a bunch of humans who explain that the Earth at the future has been taken over by alien-pod could you save your race by doing something about it? So from Middle Ages Britain, you're transported to a desolate wasteland where what's left of the world's future lies in your perilous hands.

The game uses the now-familiar point-and-click system, although it wasn't so common when it was first conceived. One small criticism is that many key objects in the game are so tiny it's very easy to overlook them, so keep your eyes peeled when you play this.

Future Wars is one of the classic adventure games from the King's huge back catalogue. It features ideal amounts of humour mixed with the occasional brain-numbing problem to create a game which ispping without ever being frustrating.

The Adventures

THE WITCHAMBERS GUIDE TO THE GALAXY
Mindscape £20.99

This is one of the almost endless breed of first adventures. Which isn't a bad thing when you look at the graphics where stars such as Mercury Island which helped start the genre shined.

As you may have gathered from the title, the game is based around the Douglas Adams book of the same name. You play Arthur Dent, one-dimensional and one of the only two surviving witnesses to the formation of the world, which came to an abrupt end when the Earth was demolished to make way for a hyper-space by-pass. Fans of the book will be pleased to know that one of the very first problems is to get the ship's landing machine to make a cup of tea. Once you get off the back of gravity, what lies beneath the rooms of land is a highly funny and very, very funny adventure.

RIDE OF THE DRAGON
Stern £20.99

The impression you get when you play the game is that the author was definitely in his or her right frame.

It's set in the California of the future and all is not well. A group of mutants are threatening to destroy the entire state if their demands are not met. Under you, someone of the new culture and all other weird sound inhabitants.

This game has loads of neat features. There are video games where you can see the people you're controlling with crude images in which appear the great governments and plenty of animated scenes to update you on happenings elsewhere in the game. A great adventure for all sorts.

LA TERN V1
Mindscape £20.99

The most established of Lord British's efforts since then, again look the realm of the gods under threat from dark forces. A lot more a three-game series than one of the sequels, with very little who's what's going on, where you are or what the hell you're supposed to be doing.

There are many features common to the earlier *Adams* games, although they are now much more refined. Imagine the image, one which is one of the most comprehensive you'll find in any game. It's also often big, with a lot of hand-drawn dotted around several thousand locations. If you're after a testing challenge, look no further.

THE SECRET OF MONKEY ISLAND
US Gold £24.99

If you're not the second game and not this one, you're missing out on a great game.

While not quite as good as its descendant, the original *Monkey Island* is still good enough to knock most adventures for six. There are few *Supernova* or a quest to become a pirate, although for stars about it is certainly the strong suit.

LOOM US Gold £25.99

From the creators of *Monkey Island* comes another point-to-click adventure faced with magically Archaic features.

The set is a village where magic is used to cast spells and everything is generally rather nice, and someone's village of the people.

The only person to escape is Beldar, the thief, as he's not very good with magic. So there he sets out to rescue somebody he has to rescue some spell. The range of the game is a good introduction to the land where it's set, and it leads you into a false sense of security as you're the first real problem, a gentle water spell blocking your progress across the sea.

This is a special LucasArts game. The graphics are good, it's a little less cute at times. Naturally, there's plenty of humour, although to begin with there isn't exactly many people to converse with, so you have to rely on Beldar's witticisms to keep you amused.

This is a perfect game for adventure novices, but if you can complete either of the *Monkey Island* games, you might find *Loom* a little easy going.

PLATFORM GAMES

*A platform game is quite simply a game with platforms in it. No less, and very occasionally nothing more. The breed grew from small roots, namely a timeless ZX Spectrum classic called *Manic Miner*, and since then has blossomed and borne more fruit than any other genre. Here's the lowdown on the best around.*

ROBODER: Millennium £25.99

First there was James Pond - Underwater Agent. Now there's Roboder. Port fish, port machine. Robo is here to save the world from certain destruction from a global threat that goes by the name of Dr. Myster. This fast fender has kidnapped Father Christmas, and is planning to take over the world by dispatching bombs as toy penguins. You have to enter Santa's lair, diffuse all the bombs and destroy Dr. Myster himself.

Robo can run and jump with very little effort. However, there are two key aspects that separate this fish from the frogs in the pond. Firstly, he can use the weight of his enormous suit as a weapon, heaving upon the enemy to squash them into submission, and secondly he can shoot his upper body parts from his lower parts, to reach higher platforms, then attach the carthing and then monkey climb himself out of danger.

The game itself is very similar in feel to the Nintendo classic *Super Mario Brothers*, and that is its strongest point. The graphics are cute and entertaining, and the sound is just on the right side of irritating, but it's new to find the emphasis has been put on philosophy. Roboder is a totally enjoyable, with just the right level of difficulty. Seriously addictive stuff.

Zool: Grendle £25.99

With all the hype surrounding SEGA's *Sonic the Hedgehog*, surely it was only a matter of time before someone came up with some serious opposition. But then *Fun Hedgehog* claimed the headlines on the advertisements. T. Shiro, Muga, the voice etc. Grendle spent a long time writing this game, and although it's not perfect, it's a great example of the genre.

Zool is an imaginative space-rings, who has got lost after a particularly busy day dimension jumping. As you have to also a get her home. Naturally, you have to fight your way through some tedious levels, so battle with all sorts of robot-like enemies and collect stars at bonus points along the way. But it's all in the name of fun, isn't it?

Then the moment you open the box, you can tell that Zool is something special. For a change, it's a game developed specifically for the Amiga, so you're looking at the best the machine can do.

This highly playable little game, once you've used to the controls, that is. Like most console games, there are quite a few moves the main character can pull off, and console owners are lucky enough to be endowed with multiple buttons. As Zool can run, jump, kick, slide, spin and fire a gun, there are quite a few possible tricks to learn, making the game just that little bit tricky to begin with, but once you've played it for twenty minutes, it becomes second nature and the game really comes into its own.

Once the levels are over that even if you find it easy to move about, you won't always find it a easy to get out. A well thought out game, and one to make your console earning friends jealous.

PREMIER MAIL ORDER

Prices marked * are not yet available and will be sent on day of release.

Please send cheque (GBP) or Visa/Master Card, and specify title for

Dept CU12, 10 Tinkler Side, Basildon, Essex SS14 1LE

FOOTBALL GAMES

Ever since Match Day, practically every software house there is has released a soccer title in one form or another. The reason? Who knows, other than they know that if it has 22 people knocking a ball around, it'll sell in droves. Here's what we rate as the top four kick-offs.

STRIKER Rage Software £25.99

The last thing you'd hope about Striker is the viewpoint. Rather than viewing the game directly from above, imagine watching the game both a top-down camera, always at a fixed distance above the pitch, and always looking upfield.

The controls are easily the simplest of the lot - a step back is the only pass, when all you need to do is shoot was get the ballie with the left flicking in the right direction, and press the fire button.

Forget any gang-bro, run-up the side and then snap-it-in tactics. To win at Striker you're going to have to learn how to use 11 different abilities, instead of just one. The emphasis really is on teamwork. For example, if you shoot the ball, and one of your players is ahead of you, he will get into a sensible position to catch your pass, control will switch to the new player, and the new computer-controlled player will run upfield to receive a return pass.

Visually, this is definitely the best of the bunch. The footie is super-realistic, even with all detail such as stripes on the grass and the centre circle highlighted on. Features of the graphical skills that might, with lesser quality code, have slowed things down, and only a galling camera operator wouldn't be able to keep up. An excellent debut game from Rage Software.

KICK OFF 2 Amiga £25.99

When Kick Off was released, the game was criticised for having options that were too small and an complicated control system. Now, of course, we all know better.

Viewed from above, the game plays out an extremely fast scoring pitch. By using an on-foot-top system, rather than a side-on perspective, it makes it far easier to pinpoint where a ball is going to land.

Controls are simple enough: no-passes. Holding and releasing the fire button at different points prompts different responses, in conjunction with changes of direction with the joystick. Holding down the fire button with the ball at your feet produces a pass, pointing the joystick in a direction and then releasing the button automatically passes in the named player in that general direction. Yes, the beauty of Kick Off 2 is the control system. It takes quite a bit of mastering, but once you've got the knack, no one can beat you.

MAN UNITED EUROPE Kinetix £25.99

Manchester United (Europe) was released to a 90% CD rating and wide critical acclaim. The Manchester team can take on the top European sides in four different competitions, including the European Cup and the Cup Winners' Cup.

Unlike the three other titles in the section, Manchester United (Europe) gives you with a Grandstand seat to view the action. At first glance, you would think that this would make

things a little difficult at times when, say, you wanted to gauge where a ball was going to land. Not so, thanks to a handy shadow that appears when the ball is in full flight.

The controls are easy to get-to-grips with. If your player is off the ball and you want the ball, he does a sliding tackle. If he is on the ball, he'll kick it. The longer you have the ball, the slower it'll go. The longer you have the ball, the slower it'll go. The longer you have the ball, the slower it'll go. The longer you have the ball, the slower it'll go. The longer you have the ball, the slower it'll go.

✓ KICKABLE SOCCER Kinetix £25.99

Kickable Soccer is based on Kick Off (hence the title) but takes about 10 minutes to learn. Basically, they were at first of Kick Off effort, but realised they couldn't better. For the most part, the game is the same, but with a few added touches. To name, it has the same overhead viewpoint, only the field-the graphics are even smaller, leaving you with a larger view of the pitch (at times) and all for a reason. Even though the graphics are tiny, they have a lot more character than Kick Off 2, whereas Kick Off 2 was criticised for straight shots and sliding tackles. Kickable Soccer includes moves like backflips, diving headers and fully-controlled set pieces.

On top of that there are full management and tactic design segments, where you can set up your entire team to play the way you want them to, from basic running around to corners and free kicks. This adds a lot to the game, and removes the feeling of being cheated by dumb computer players that most football games seem to offer.

I'm Managing Fine, Thanks

There is another side to football games, that of the tactical and much managed management simulation. Ever since Kevin Keegan wrote that wonderful (yep, Football Manager on a scrap of paper) script for those who like to see themselves in an effort to create the ultimate club.

TRACKSHOOT MANAGER Graham Dimes £25.99

I'd had everything a budding manager could want, with his huge database - accurate. Doug Matthews, designer, once said "A manager should be taking the team what to do, not before the fact." And only, the match itself is described in a scoring commentary, so waiting along the line of scores presents up, but without, excepts. What are you doing, now? (G.D.)

GRAHAM MATTHEWS' SOCCER CHALLENGE Kinetix £25.99

As with any management sim, all the standard options are included there, too, but not, I, along with some rather silly graphics. The game is run from a diary which contains all the fixtures for the coming year, along with training days and holidays.

After each match, you can see the results to your team, along with the opportunity to pass comments on the match at press conferences.

LETHAL WEAPON

TWO COPS - BOTH LETHAL

A multi-level shoot 'em up based on aspects of all three LETHAL WEAPON movies. You can choose to be either one of the two high fire-power cops... each having his individual strengths - and weaknesses! There are many missions to complete including the rescue of a kidnapped girl, the pursuit and arrest of drugs funnels, finding and arresting a police murderer, plus many more. You choose the level to suit your objectives within the game-play.

THE NAME GAME

If there's one thing that can make or break a game, it's a big license. I don't mean signing up an arcade game, I'm talking about big film and character licenses. If handled right, these can be massive money spinners. Here's a selection of the best.

BATMAN THE MOVIE *Atari Speed* £7.99

Can there be any fun this was as widely popular as Tim Burton's Dark Knight extravaganza? Everywhere you looked, Batman logos accompanied the word. Wimbledon officials banned Batman T-shirts, the comic started to sell again and Michael Keaton became one of the world's most sought after stars. When Keaton signed the rights to the game, the computer world held its breath.

Where fan licenses have generally been disappointing, Batman was wonderful. It captured the essence of the film perfectly, and the atmosphere and energy created by, say, one of the excellent driving sections was exactly what a game like this needed. And in case you don't remember, the game follows the plot of the Joker's emergence into Gotham city and his attempts to take over the world with 'Omigod, an incredible that causes death by smiling'.

Built over five levels, the game followed two main styles. Levels one, three and five were platform runners, with the vapour character using all the weapons at his disposal (gun, batwing, grappling hook and ropes) to reach his way through the Joker's henchmen and eventually take on the big guy himself at the end.

The remaining levels were very fast driving sections, with the action viewed from slightly behind and above the Batmobile, as in Lotus and numerous other driving games. First you had to drive through the city avoiding the cops, then you had to fly the Batplane around the Joker's hideouts.

The game looked the part, with an excellent Gotham style, and the music and effects, though limited, did the job well. A novel way to present the license, and easily the best that Keaton has done.

Even more the fun and thing than the one thing itself: that's your cousin on Jimmy White's Whirlwind Snooker.

JIMMY WHITE'S WHIRLWIND SNOOKER

Virgin £29.99

This game started life as Arthur Maclean's 3D Snooker. That was a couple of years ago. Then Jimmy White stepped forward and said 'hey, why don't you get someone to endorse that?'

The book at Virgin learned it. It's the Personality and signed up Jimmy White. The rest, as they say, is history.

When it appeared, it was unlike anything seen before. First, 'Virgin had already released a game called 3D Pool, but it wasn't a patch on this. Featuring a table that you could view from all angles, zoom in and out of, spin like a top and still keep a shot, the speed of the graphics was something that blew everyone away. And then you dropped it.

It isn't a game you could imitate as perfect, then this is the one. Fantastic it mimics the real game of snooker, and presents it in a way that becomes natural to us in no time at all. If you are familiar with the game, and find yourself a bit of a whizz with a cue, then you'll have no problem playing this game. There are no surprise angles here, no impossible shots, and absolutely no cheats available.

In fact Arthur Maclean says, there's 100-000 is four years there in. If you should know the game for a few seconds, this appears on the screen and start thumping around. Leave it for a little longer, and the balls start to put faces...

What can I say? If you the answer, then you have to buy it. No question.

Yes, Madden is on your system at your command. John Madden's Football is the best NFL simulation ever created.

JOHN MADDEN'S FOOTBALL

Electronic Arts \$25.99

This game was already a masterpiece on the Sega MegaDrive, and I can't remember getting as many phone calls asking for the release date of a game as you to *Game*! Figure it: I mean you didn't know John Madden became the youngest headcoach in history in 1989, and to take a commentator for NBC. This game is the best version of the sport ever to appear on any home machine.

Making tapes between managerial and arcade action is always a bit tricky in computer manager games, always seems to jump on one or the other, but not this one. You are told to control 10 NFL teams and have to guide them through the season and hopefully end up in the Superbowl. In your capacity as coach, you have to select and train up your team, as well as set out the plays

for each match, even though you're provided the strategy and randomness of the opposing team.

Then, you have to take on the role of quarter back, and put your all into the arcade section of the game. Again, this section is done brilliantly and with real atmosphere. Feel the crunch of bones as half a dozen 10 stone padded weights fall on you.

There's a lot to John Madden's Football. Far too much to go into here. The number of different play options is staggering, to say the least. If you want to know more, check out the review in *Electronic Arts* Amiga, where it scored a whopping great 88%, and *Game* strongly called it "the most addictive sports ever!" Who needs to say more?

The Boys...

SLYMA
Amstrad CPC/MSX

To date there have been three films games, two graphic adventures, and an arcade romp, all of which have been quite good. The adventures are at the peak of the genre and most of them have great variety, but the only one more than the last, especially when you consider that they both cover at least four days each. The arcade romp is a standard platformer that features some rather brutal penalties, as in all good games.

REXAL JAMES
Locomotive C64/MSX

There have been countless Indiana Jones knockers over the years, including the decent-but-boring CD-ROM movie game, but there's a couple of adventures out there of the kind that the company have now done. Indiana, both in number of locations and in inventiveness, all take even the best adventures to get through them. Nevertheless, to be fair, this is the only way to get into the character of Indiana himself.

REXAL JAMES
Ocean MSX/PSX

After two disappointing Indiana Jones came out with this one, long before the film had even finished, it's a bit to say here and a bit to say there. It does, however, fit the character of *Indiana* perfectly. Playing with a multiple game style, *Indiana* contains a couple of amazing little personal program sections that have for years written through mud, and even better, they're in *Amiga*. If you want to know how the world looks through the eyes of a machine, then this is the game to go.

ADDAMS FAMILY Ocean \$25.99 ▶

Addams is, most Amiga owners are a little bit put out of their minds because they've got Mario. Well, at least to play it at home. But there is at least a few... something like it in the Amiga, and now that is. When Ocean signed up the Addams Family movie, they saw it as the perfect chance to put out a Mario killer, and they did.

OK, so it doesn't quite follow the latter story-line as the film, but the characters are more or less the same. A properly developer wants to make the house-drawn world a block of flats, and has kidnapped everyone except for Gomez. Being a respectable head of ghost, he sets out to free his family.

Yes, it's a small platform game, but it's a bloody good one. Set in the big wings of the house and the graveyard, you have to run and bounce your way through relatives the house-mom as you, in Mario style, jumping on bad guys, like them. Beware of anything kills you.

As you work through the game, there are all sorts of little surprises to find, from secret rooms filled with bonus points, and energy, to hints about increasing your maximum energy (the amount of lives you can take before you crash) and the secret weapon - the Fan option.

Collecting this gives you interesting abilities, in much previously inaccessible platforms, usually

Scary! Mario isn't jumping through the wings of this house, is he? You can't get any more into the Addams Family.

stuffed full of goodies.

So it doesn't have a lot in common with the film. That doesn't matter much. What does matter is that it is a very enjoyable and addictive game,

and one that could stand alone quite easily. The *Indiana* is just an add-on bonus. Well, why are I telling you this? You should have bought it already!

ROLE PLAYING GAMES

Traditionally, role playing games consisted of a handful of spotty youths with reams of paper and geometric nightmares instead of dice. Then along came the computer, and with it a new breed of role playing game. Instead of relying on a dungeon master to provide a description of a situation, you can see what's going on for yourself. So get yourself a new persona and check out some of these RPGs.

EYE OF THE BEHOLDER 2

US Gold £25.99

Following up on the classic Eye Of The Beholder wasn't going to be an easy task for USG, but they managed it, with an improved control system, more locations and some horrible dangerous dungeons.

If you completed the first Beholder game you'll be intended to know that you can advance your characters even further in this one. There's a greater array of spells, weapons and abilities open to adventurers. There is a price to pay for this, though, as many new abilities have been brought in to threaten

your quest. In addition to dungeons you can now wander around outside, which means all sorts of new weather conditions.

There is a lot of exploring to be done as well as puzzle solving, and it helps to have a pen-and-paper friendly job sheet notes and map-like sections of dungeon. Because of this increased difficulty you may need to take more about what you're doing. You won't last long if you lead your party into combat, then start equipping them with suitable weapons.

Magic items also come more into play as certain creatures are affected by specific weapons.

The graphics really stand out in Beholder 2. The perspective backgrounds and fantastic creatures give the game an excellent atmosphere. Even the icons/bars are well presented and clearly laid out.

This is one of the cheapest RPGs available, but because it's tougher than the original (play to learn played the first game so you can grab onto it) rather than be thrown in at the deep end.

There's a wealth of monsters in Beholder 2. You can see the Beholder 2 manual on the screen.

Shadowlands lets your character roam around a vast wilderness.

SHADOWLANDS

Domark £29.99

This game is a little weird because you don't actually take the role of a party member. Instead you sort of remote-control a group of adventurers.

Shadowlands employs a novel control system. To issue a command to a character for you have to click on the relevant part of their body. A lot of the game seems quite confusing at first, for instance controlling four individual characters during combat

takes some getting used to.

The graphics are used to excellent effect, most notably with lighting. When a sun sets around him or her it is the further away the darker it is. This also adds to some puzzles, as you can't see around corners or through doors, so there are several strategically placed groups of monsters to catch out any characters that stray too far from the party. Equipping the group is also quite challenging. Spells, armor and weapons are too good to be taken, so you can often decide what you have between the two, or have the super tough lighters and know that they can handle most of the combat.

Shadowlands seems quite bizarre at first, but the excellent graphics soon win you over. The game has a really nice feel and looks to be a whole new kind of role playing game. You're still required to put your brain to work to solve a number of tricky puzzles.

Eye takes the best selling RPG game, the game (Dunaid's) equally successful computer game.

HEROQUEST Grendin £25.99

DUNGEON MASTER

ITL/Pygmalion £29.99

This is the game that provided the impetus for most modern RPGs.

The display consists of a large window which shows the scene immediately in front of the party, the status of the characters at the top and various command icons at the side. These simple features combined to produce an RPG that was so easy to use that people featured in no time, although it took quite a while to get the likes of Eye of the Beholder. Dungeon Master is still

a very good game. The maps are very large indeed, and populated with a great many foul creatures, including zombies and skeletons who are a bigger threat. It takes to play a strategic game, up to when the odds look stacked against you. There are many scenarios that can be found early on that are best left alone until your party have advanced sufficiently to have enough magic and hit points to deal with the affliction.

What really makes Dungeon Master a strategic game is your 'quest' (RPG) you could go to the world that you live in. It's now comes (bundled with Chess Bites Back for only £29.99).

A Partying We Will Go

Eye of the Beholder £29.99 (Dunaid £29.99)

With a comprehensive sequel to the first of the Eye of the Beholder, it's a testament to the original that it's hardly ever shadowed for such an awesome game.

Beholder seemed just about everything when it was first released. It combined a complex plot with a great deal of role-playing and a lot of strategic thinking. Being able to find out as many as you could about the game and its graphics and plenty of characters and spells.

If you've played Beholder 2, this will look a little dated, but that's not a good enough reason to pass up on a chance, is it?

Captain Mushroom £29.99

It's the first of the series, and it's a very old one. It's a game where a genius has got his hands on a powerful computer. Using this power, he's using his skills to achieve a group of robots and command them to conquer the world.

This results in a game where the Captain Master with him. The control system is very simple and the game itself is much the same way. The game is completely strategic, so it's expected to turn the night out with this one.

Dunaid's Tale 3, The Tree of Fate £29.99 (Dunaid £29.99)

Along with the Ultima series, the Dunaid's Tale games are the most popular of the series. The game is a very complex one, and it's a very old one. It's a game where a genius has got his hands on a powerful computer. Using this power, he's using his skills to achieve a group of robots and command them to conquer the world.

Eye of the Beholder £29.99

Eye of the Beholder is the first of the series, and it's a very old one. It's a game where a genius has got his hands on a powerful computer. Using this power, he's using his skills to achieve a group of robots and command them to conquer the world.

GOD SIMS

These are the games for people who like power, control and putting into in plastic bottles then shaking them around. They're the God-sims, so called because the fate of nations and worlds lie in your hands. Some call on you to marshal your forces, others to conquer at all cost or even unite microcosms with lightning bolts. This is a relatively new genre of game, and one which will no doubt see many additions in the future.

POWERMONGER Electronic Arts £29.99

Like Populous, the Powermonger was designed by Bullfrog, and the final game you control a civilization of tiny people on an isometric landscape, although this time you're without any special powers.

What is the theme of the game? You start off with one army and the goal of conquering a world by whatever means possible. It's not as easy as pointing them at an enemy village and shooting it, though. Firstly, they need food, which has to be sent along supply routes, found in the form of sheep which roam the land or gathering villages. Technology also needs to be researched to give your soldiers the edge over their foes. The importance of this is that even when a group of your men meet an enemy, you'll need a good army to win.

As you go further into your quest you'll encounter other generals who can be recruited along with their armies to fight on your side. A certain amount of diplomacy is also called for as not everyone shares the game played to a perfect end. If you encounter a neutral village it doesn't pay to slaughter their sheep and burn everything to rights, instead try to be nice, and bring the sheep back, around to your way of thinking so they'll fight for you.

A great deal of thought is required to play the game, which makes it hugely absorbing. There are also expansion disks available, both for the World War One edition, which make the game even better.

POPULOUS 2 Electronic Arts £29.99

Populous was the game that spawned the God sim genre, and with its sequel programmers Bullfrog created a game which stands head and shoulders above the competition.

The aim of a game is quite simple: you and a rival deity are given a world and instead of using what you can do to conquer, you use it to build a better world for your people.

Naturally, things would get a bit boring just watching a bunch of computer-generated villages flourish (and each other to death), so you're called upon to provide some divine intervention: nudging your people in one direction while sending in the 'th' of the other guy's when his back's turned.

Your holy animal consists of 20 powers which allow so things to people or the land they inhabit the most basic thing is land tucking. This comes into play right at the start, where the aim is to create the terrain on which the mortals can build.

castles, which provide defense and plenty of room to breed, creating more soldiers for their armies. From there each 'realm' consists of villages, castles, and fields can be collected together with combinations of different powers that may cause some damage.

The graphics are isometric, with tiny sprites used for the people. This provides an excellent sense of proportion, especially

when you dump a whopping great volcano right in the middle of an enemy collection.

Virtually everything about this game is spot on, from the smart graphics to the awesome game play.

WORLD CREATOR £29.99

Deep space is the setting for this God sim, with you in charge of a colony right on the edge of the known Universe. As the administrator it's your job to raise the standard of living on this mud ball colony to 100%, while dealing with aliens, and other events that test your settlement. When the ball finally gets rolling and the population increases, you have to manage building programmes to create more housing and amenities, as well as increase the police force. The sticking point

behind these plans is finance, with space is no village from resources.

Humans aren't the only inhabitants of this planet, there's also a resident colony of aliens. Naturally, they aren't too happy with their new neighbors, and the decision to tolerate or attack them is yours in your hands.

This is a little more complex than the other God games, combining features of Populous and Dem City. The control system is clumsy and takes time to get used to, but its worth persevering with as this is an enjoyable game.

ARCADE CONVERSIONS

Recent months have seen a drop-off in the number of coin-op conversions appearing on the Amiga. Is this because the software companies feel the latest wave of high-tech games to hit the arcades are unconvertible? Who knows. Whatever happens, the Amiga already has acquired more than its fair share of excellent coin-op conversions over the past few years.

RAINBOW ISLANDS Hit Speed £7.99

This is the game that sparked a whole wave of so-called "rummy" games on the Amiga. The aim of the game is to get to the top of a series of vertically scrolling levels which are set on several islands. This wouldn't be much of a challenge if it wasn't for the hordes of monsters which come after you. Our hero's only defense comes from his excellent jumping ability and the rare talent of being able to produce rainbows from his finger tips. While rainbows look doesn't sound like much of a weapon, in this game you can use the rainbows to help you get to the higher levels or to hit monsters.

Each level ends with a rainstorm with a time, but there are more rules than rainstorms. Most are surrounded by platforms, which have to be traversed in order to avoid the boss and get some life.

There are bonuses galore throughout each level. Most of them just tell you your score. Others increase the amount of rainbows you create and the speed your character moves at. Although *Rainbow Islands* looks like it's completely dependent on joystick skills, there are lots of different strategies that can be used on particular levels and, as if that wasn't enough, there are plenty of secret stages too. They're difficult to find, but it's worth looking out for them. Without a doubt one of the most addictive games ever on the Amiga. There's no much to say: the game's just what it is.

IPANK Hit Speed £7.99

You can't beat the coin-op this game is based on from original in Japan. What else would you get a console as feature as having around the world touring? I think this may sound about as exciting as playing over too many, it does make for a frighteningly addictive game. Each level is played on a single screen, and to begin with you're faced with just one large balloon. The hero is armed with a gun that fires a stream with a spike on the end. When it hits a balloon it bursts into smaller ones, but the balloons if you can remember that for later. As you progress through the game you face more and more balloons of boss, and platforms appear. Finding one to take note and causing the balloons to become trapped, adding to your problems.

Some helpful, and not so helpful, bonuses appear from time to time. One of the best is the gun, which swaps your chain weapon for a one which makes short work of the balloons. Another useful one doubles the amount of chains you can fire, while collecting dynamite explodes all the balloons on you're not facing hundreds of tiny ones.

Plus has the added bonus of a two-player mode, which makes it even more playable. An essential purchase.

GAUNTLET Hit Speed £10.99

Gauntlet is a real arcade classic, and the conversion from *Libri* really does it justice.

It's set in a Dungeons & Dragons type world, which is made up of many rooms. Features like the aim to get through these one-perk.

There are four characters to choose from: the Wizard who's competent in magic and not much else, Warrior who's not much as good with magic but can move faster, Elf who's the fastest of the lot and Warrior who's not good with magic but

excels in combat.

While the graphics are top they are lots of them. The rooms come under attack from hordes of creatures, as well as the occasional Death who appears from time to time to drain the energy from the first available character. Many of the levels contain subtle puzzles such as a series of magic blocks which have to be broken on in the right order to open doors. The game is played against the clock, as the character's energy

depletes constantly, even when standing still. Power has to be collected to replenish it, which often leads to confrontations between two players who are both close to death.

The Amiga version is every bit as playable as the coin-op original. It has all the features, right down to the multi-turning two-player. If you hang around for long enough, some of the games shouldn't miss this version.

STRATEGY

**SUPER HANG-ON** *Hi! Syzed 87/89*

Super Hang-On racing game comes into play for this quality arcade conversion.

Despite being a real golden title, Super Hang-on is a fantastic conversion of the old Sega coin-up. Although it's been around for a few years, Super Hang-on is still one of the best racing games available for the Amiga. It has all the right ingredients. The action is fast, there are plenty of other riders who can be faced off the road and the graphics are great throughout, with a smooth scrolling track and road-side objects that update in continuing manner.

Super Hang-on is also very well presented. There are four different tracks set in various parts of the world. Each has its own set of graphics and specific hazards which can test the greatest riders. This can even select what time you want to accompany you as you race.

Plenty of Continues

AMERICA'S CRIMINAL OFF ROAD
Hi! Syzed 87/89

Breakout games hang up to date in this vital looking coin-up conversion from Ocean. Unlike any other game where you simply had to smash a few bricks by throwing a ball off a paddle. Now you've got loads of collectable coins worth an extra-a-bit, super-smooth fast, multi-ball and a laser gun. Some of the levels are very tricky too, requiring one player to sit at the end of the road in a position where it can't be seen, and causing you extra problems when it should not again.

Although it can be quite frustrating at times, there is no doubt that this is an addictive game which is guaranteed to test your reflexes.

WORLD CHAMP
Hi! Syzed 87/89

Here's one of the first Amiga games that should be described as arcade perfect. The graphics are crisp, scrolling is plenty, and the action is fast and furious. You, and a friend, control Bob and Ben. Instead of having the three regular trouble-makers, which can be used to trip the ropes. Like most Japanese platform games there are plenty of fruits and loads of bonuses to collect. The real secret is a great game which is even better with two players.

OPERATION THUNDERBOLT
Hi! Syzed 87/89

The coin-up version of this game was recently recognized by the two winning great look which were displayed on the front of the cabinet.

It came along as the sequel to Operation Wolf, which is one of the most popular and on the Amiga. The action is violent in the most perfect way, with you blowing loads of anything that moves with a machine gun and rocket launcher.

Not only does this game have the side to side scrolling of Operation Wolf, but it also features that 30 minutes where you have to shoot in a tank in a map.

Like the original coin-up conversion was, but a good lot of super machine gunning and rocket launchers, and that's what makes this game so much fun.

**NEW ZEALAND STORY** *Hi! Syzed 87/89*

Here, on the left of them, are the unlikely subject matter for the game. You see they're all bears' companions. But only.

At this time when you're on a mission to rescue your kindred from the clutches of the evil forces that hold them hostage.

This is one of the best platform games on the Amiga before it was superseded by the likes of New Zealand Story. Even so, it's still very good fun and worth getting hold of.

MILITARY SIMS

There are enough military flight-sims to fill a section, but the armed forces don't end there. If you've always wanted to get fallen in with the army or take to the high seas in a state-of-the-art submarine or destroyer, then here's your chance.

BIG TANK PLATFORM

Microprose £39.99

After Vietnam was played at the post by the Americans with the combat to supply the Russians with tanks, you can find out why. *Big Tank Platform* gives you control of your very own column of heavy, state-of-the-art American tank divisions, battle tanks. These computer-managed tanks are not afraid with high explosive like I missiles, tank-killing Sabot-rockets, com-

puter-aided laser night-vision devices and a large 100-calibre machine gun.

The graphics are top-quality 3D-rendered, with 3D-rendered terrain display and vector graphics for vehicles and objects. Unfortunately, most of the combat takes place at a 45-degree angle, with your starting positions from the air, or vice versa, so there's not much opportunity to see anything close up.

While you can do it in any of the tanks in your position, your real task is to guide them to their targets, pound the hell out of what they find there, then get them back safely - anything else just stops you getting scored. Your real on your own though, as the missions give you control of anti-tank batteries, tanks and not many tanks, which gives the game more of a strategic element. In addition, artillery strikes can be called in, as well as air strikes from helicopters and in a tank-killing aircraft. One of the most comprehensive simulators of any kind.

SUBMARINE SERVICE 2

Microprose £39.99

Steak service takes us back to World War Two, when submarine warfare was still at its infancy. One of your biggest enemies is visibility. Torpedoes, for instance, can't be used. You may think that the fact that it's right in your periscope sights is going to get to you, but you're only to have a torpedo launch randomly off its side.

Another drawback of 1940s technology is the poor sonar. It can be very difficult getting up a contact, so the periscope's other employment is finding ships. But all the effort is worth it. Once a contact is made and you're treated to a graphic of the vessel, you can explode and sink it.

PACIFIC ISLANDS

Empire £39.99

Pacific Islands really puts you in the thick of things, as you look out of the eyes of four tank-platoon sergeants at once.

This starts by dividing the main screen into quarters, with each showing a tactical display from the lead tank of each of your four platoons. The place to start is a map screen, where you issue the move and attack orders to each platoon as well as receive an overview of the battlefield. When a platoon encounters an enemy, simply clicking on a window brings it up to full size so you can deal with the situation, so that the game doesn't become too complicated, the four tanks are controlled as one. This means issuing a few commands will only mean you tank fire if you hear that's the only tank that can. There's no waiting for a reload, though, as the next shot comes from the next tank and so on. You can also leave the computer to fight your battles, which is essential on the later missions where the enemy strikes from all sides.

Not only do you have to be an expert tank pilot and strategist, you also play the role of the platoon's sergeant. Repairs are expensive, and you're only allowed a limited budget, which shows with poor performance on the battle field.

Viewage in the turret of the tank you control the first

The Call to Arms

Empire £39.99

Rather than just deal with one mode of attack, *The Call to Arms* has tank, sea and air.

Your overall mission is to wipe out the enemy's HQ by playing a variety of great combat scenarios, although there are several smaller tasks to complete en route. To fight your way through the mine fields, you can control tank, tanks, helicopters, amphibious tanks and even destroyers.

Despite *Call to Arms*'s many elements it cuts no corners. You need to plan out your route to take in supply dumps and an airfield which help you out. Mastering the different vehicles is its most fun, either. It can be a long time before you're finished with this game.

CAMPAIN COMMAND

Empire £39.99

This was a ground-breaking release in 1987, and all that time it's as good as new.

It's set in a massive knowledge part of which

is learned by your side, with the rest either released or in enemy hands. To conquer all of this strategically vital area, you'll have to fight it all along with your superb super computer. It's equipped with aircraft, amphibious craft and a formidable arsenal of its own, all of which have to be equipped to capture the islands and then off the equally powerful enemy carrier which is out doing the same job.

All these elements plus the strategy side of the game make it highly playable.

A NEW WAY IN
HOME ENTERTAINMENT

STRATEGY GAMES

This is where reflexes end and cerebral process begins. Strategy games require pure brain-power as you manage a city, create a planet, fly off the rails or stir up trouble in neighbouring countries. Strategy games are usually far more involved than most other games, which is often reflected in their sizable manuals.

SIM EARTH Ocean £34.99

Sim Earth literally places an entire planet at your disposal. You have complete control over every thing, from triggering continental drift to generating the flora and fauna.

It's divided into several chunks such as the geosphere which covers the geology of the world, the hydrosphere which takes in the oceans, trees and lakes, the atmosphere, and the biosphere which deals with the planet's biosphere and evolution. Each section has its own options and how you develop one affects what goes on in another. For instance, creating plenty of carbon dioxide in the atmosphere at an early stage will raise the planet's temperature, which in turn moves oceanic in the geosphere, higher and more fertile oceans in the hydrosphere and causes the extinction of certain animals from the biosphere.

There are a number of scenarios which range from creating your own planet from scratch to re-creating Major's disastrous Venus. A major selling point is the ability to trigger earthquakes, volcanoes, which is an extremely priced feature is just right for creating a civilization which is getting too big for its lairs.

RAILROAD TYCOON Micropress £34.99

Most people have played with trains set at one time or another, and there's one for you here.

Railroad Tycoon involves a lot more than creating Henry James into your Action Man though. Set just after the invention of the steam train, you've been hired to run one of the first commercial railways.

The game features a number of settings, from optimal east USA-inclined east, or if you fancy playing closer to home you can set up shop

SIM CITY Action 16 £10.99

This is a fundamentally playable strategy game in which you get to create and run a city. You start with a limited budget and a bank of 16 teams representing various types of city improvements. As your city grows so do the problems associated with any urban development. Crime increases along with the population and large scale pollution and traffic problems set in.

As long as you have money in the bank you can make any improvements you want. So a nuclear power station in the centre of town is perfectly proper (looking around the corner are natural disasters). These occur without warning, so you can mitigate them if you're in that kind of mood and can include solar energy, wind-powered, nuclear melt-downs and 2000s training camps. Other something like this happens you then have to attempt to repair the damage done and prevent the population fleeing, which is tougher than building the city in the first place.

CIVILIZATION Micropress £34.99

If a planet's too big for you and a city's too small, you might choose to run a hand at managing a civilization. The game begins in the year 2000BC. You're presented a map of a small tribe struggling to make an impact on history. To begin with, history and the wheel are essential, but over the

next 1000 years advanced such as combustion, gunpowder and nuclear power have to be acquired to build a thriving civilization.

Elsewhere in the world there are other civilizations such as the Incas, the English and the Mongols who are also out to create massive empires. It's possible to trade with them, or if you want to take a more aggressive approach, turn them empires to the ground.

Everything is Under Control

CITIES

Micropress Arts £24.99

This is quite a strange idea for a game. Basically you have to make and manage a number of machines to light and light off houses throughout the town.

It sounds weird, but this is actually the basis for a very sound game. Design the blueprints for your own cable in the country then watch money from the proceeds to pay for it. All the time you have to balance your money with delivery. It's a bit of a puzzle, but the wealth and power from the substantial territories. Great fun.

SIM AND

Simon £14.99

The Master Mind Simon puts you in the shoes of a mayor who is in charge of an entire city. In the middle you have to make the city into a top light-house and determine which types of city should be built. It's a bit of a puzzle, but the wealth and power from the substantial territories. Great fun.

Take Sim Earth and the City, Sim Arts very absorbing and a bit of a puzzle.

BALANCE OF POWER

Micropress £14.99

Focus on your diplomatic power for Balance of Power, the game's original theme. As President of America, or Premier of the United Kingdom, you have to play your cards as your opponent and manage military forces and the secret service. Inside your neighbors or be too to them, what the hell? The game's foreign policy as you attempt to win the hearts of continents or crush the red block, depending on which side of the coin you're on.

next 1000 years advanced such as combustion, gunpowder and nuclear power have to be acquired to build a thriving civilization.

Elsewhere in the world there are other civilizations such as the Incas, the English and the Mongols who are also out to create massive empires. It's possible to trade with them, or if you want to take a more aggressive approach, turn them empires to the ground.

FLIGHT SIMS

The choice is simple - spend a couple of grand getting a pilot's licence and zip around in light-aircraft, or splash out 20 and try your hand at airborne death-dealing. The Amiga now has a wealth of excellent flight-sims which cover both worlds (some late 80s games actually feature WW II) with biplanes, jet-fighters and helicopters.

WINGS Overwonders £14.95

This straightforward Overwonders is definitely not one for light-air pilots as its attraction lies as much in its simplicity as its presentation.

It's set during the closing years of the First World War, when fighter aircraft were just beginning to get off the ground, so to speak. You've been recruited into the Royal Flying Corp to help win air superiority over war-torn Europe, although the life expectancy of new pilots is very poor indeed.

Like all Commodore games, Wings has a distinctly stilted look. All the way through you're updated on the goings on of your chosen pilot and what the Hun are up to.

During dog fights the action can be viewed externally or from the cockpit. Extension views come in handy for spotting enemy aircraft as your field of vision is limited in the cockpit and, unlike simulations of modern-day warfare, the only tracking device you have are your eyes. Bombing runs have a different view point. Here you're looking down on the plane as it flies over enemy land. You still have control over it in the usual way, but hitting the fire button now releases bombs instead of triggering the machine guns.

While Wings has a fantastic atmosphere and is superbly presented, it isn't very complicated. This makes it ideal for beginners, as there are few key presses with regard to the controls (except around the joystick). Experienced pilots may find this a little off-putting, but they shouldn't let that put them off what is really a superb all-round game.

For flying by the seat of the pants option, Wings cannot be faulted.

KNIGHTS OF THE SKY Microprose £14.99

Like Wings, Knights Of The Sky is set mid-way through World War One (but the difference here is detail).

While Wings is very playable, this game is far more realistic. This sign on as a trained pilot in either the Luftwaffe or the Royal Flying Corps with the aim of earning promotions, leading units and making a name for yourself in the flying community.

As the game progresses and you start racking up kills, some of the established enemy pilots start taking an interest in you. Whilst this happens you stand a greater chance of coming into enemy circles, who don't like upstarts with an untapped number of kills.

One of the most notable features of the game is its speed. Considering the amount of ground detail and the complexity of the other elements, the game rarely slows down and plays at a cracking pace throughout.

It's the lack of modernity in a 3D sense that makes the game so much fun. There are no missiles, electronic jamming or radar, you simply have to spot an enemy, get in close and sort up with your machine guns. This makes the game far more action-packed than most jet-plane sims. Sabotaging becomes vital after a few games, as most of the British fleet planes over the same area, but unless you find your base there's still the landing to cope with.

A tedious change from the usual faster than sound flight simulators.

Take on the Hun in this extremely playable WW1 flight sim.

SPORTS

THUNDERHAWK Core Design £36.99

From fighter planes are more into helicopters, with the 44-224 Thunderhawk, a multi-role attack helicopter.

The main of this game is action rather than complexity, which is reflected in the lightning speed it plays at. The background and scenery are simple, but plenty of effort has been put into the enemy units. There are loads of things to shoot at, from unarmed convoys to tanks, anti-aircraft batteries and too many to other helicopters and fighter planes.

This game is packed full of inspired touches. For instance, when anti-aircraft guns open up you actually see the bullets streaking up towards you and, as your helicopter is damaged, one of the control panel start going off the back and bullet holes appear in the window. Fortunately, you have a large amount of missiles to choose from, as well as a laser cannon mounted on the top of the rotor.

Because action is the name of this game the controls have been made as simple as possible. Speed and weapons selection are all controlled via combinations of joystick movement and the fire button. Three large monitors beneath the window show all the information you need to keep airborne, which saves you more time to concentrate on shooting things.

The missiles are arranged in a very sensible manner. They come in groups of five, with each sub-launched fired to the next. This means that anything you fail to destroy in one mission can come back at twice a cost of you in the next.

Thunderhawk is without doubt the most action-packed flight simulation there is on the Amiga.

Fly the most advanced plane in the world - the F-19

F-19 Microprose £36.99

With this game Microprose dumps you in the rather unrealistic seat of the USAF's latest and greatest war plane, the F-19 Stealth Fighter.

What sets this apart from other modern-day aircraft simulations is the amount of strategy involved. Many games require you to simply get airborne and launch a couple of missiles at a bog on your radar. F-19 however, calls on your skills as a navigator as well as a pilot to guide the aircraft protected into enemy territory. This is done in a number of ways. A bar graph shows how close your plane is to enemy radar and when it passes it remains levelled it then he says. To keep it hidden, you have to keep the jet running below a certain temperature, the plane flying well below 1000 feet and the bomb doors closed until you really need to drop them.

Like most Microprose simulations, the game is divided into a number of sections. The section is the American training missions, where friendly planes mode-dogfight with you and launch during missions. Then there the game moves to the Mediterranean and combat strikes against terrorist bases in Libya, and then onto the Gulf and Central Europe during recent Gulf Wars.

All missions light out to experienced pilots and beginners alike.

Up, up and Away

PRO-FLIGHT 16-568 £36.99

Realism is the name of the game in this Fantasy Jet Flight 16-568. They claim that it is the most comprehensive action Fantasy

Whether that is true or not, this is one reality in fact. There is a staggering amount of controls and instruments which take a fair amount of time to get started. Once someone takes an effort and no fly in a new way, he does get the most of short things.

This is one of the toughest flight sims you'll ever get, although it's a little short on action. Even veteran pilots will find a challenge in this.

F-16 STRIKE EAGLE II Microprose £36.99

Programmed by the team behind F-19, Strike Eagle features more strategy but far more action.

The game has plenty of features to make it accessible to beginners, including automatic landings and a no-crash option. Because it was written in '87, it became the first flight sim to take advantage of the computer's natural stream up to the Gulf war.

There's plenty to do and it's really fast, but even so it's a bit too busy at times.

GLADIATOR Microprose £35.99

The original PC and SGA versions of Gladiator are now about four years old, and the slightly newer things version does what this age.

It has all the characteristic shortcomings of a Microprose sim, such as dozens of missions per episode the world and excellent characterisation. This is a very different game from Thunderhawk, but plans a vast space is far more time preparing up from before into their disappearing before the shooting starts. It's not a full-time realistic, unfortunately. It takes the action of Core's sim series, which has the definite edge over this game. Gladiators out for a number of the updated Gladiator (and is an opening new-world Amiga).

THORN FIGHTER HOUR, US Gsm £35.99

What makes this game from most flight sims is that the graphics are split right into their video board, which gives it a nice look, but makes the game considerably slower than many of its rivals.

Basically, you're stuck in an F16 aircraft of your choice, be it fighter or bomber, and instructed to fly to the Gulf to destroy Iraq's air force down various bits of Iraqi equipment.

Typical like the probe which follows out of missile launches and the way you can't attack sometimes at enemy planes makes this game fun to play. Although it takes the extra features, and speed is made it a full blown classic.

SPORTING GAMES

A sporting life can be one of fame and fortune—but, for the rest of the population, all that we're capable of doing is injuring ourselves and watching Grandstand on TV. Of course, you could always participate with your design. Mock, you don't have to embarrass yourself and the worst injury you can suffer is joystick wrist or fire-button finger. So, here are a few of the safe alternatives to real-life sporting encounters.

Get some swingin' on things with one of the best golf titles available, the exceptional PGA TOUR 95 which more closely to an extremely authentic situation with real life scenarios.

PGA TOUR 95

Electronic Arts £25.99

PGA Tour 95 takes you into the foreplay of the world where only golf and company names can afford to tread. This is really the complete golf game. It has all the features of real life, including unpredictable wind and balls which stop to put you off foot-steps. To take a shot you first select a club, then the direction you want to strike the ball in. Holding down the fire button powers up a gauge which determines how hard your golfer will swing. Let go at the right point, then the ball launches again when the gauge returns to zero. Doing it too soon slows the ball, and too late creates a very nasty hook shot. It's the state of control that helps make the game so attractive. Although the course comes with obstacles such as bunkers and lakes, and the normal penalties apply, along with all the usual rules such as re-takes and drop zones. Unfortunately there's no cheating with the Amiga making your name card.

On top of the excellent gameplay are the superb graphics. Although not much can be done with a primitive sandy-green landscape, the golfer is superbly animated which gives a very nice feel-all effects. Rather than just have you going around with your finger, keeping it to the ground, you can compete against a friend in a piece of computer golf in a beautiful over 18 or 32 holes. Without a doubt the best golf game outside of St Andrews.

The completely brilliant Application 2 provides the greatest Amiga golf ever.

SPEEDBALL 2

Remedy £25.99

This game holds many titles to be held such as best sports game, most violent sports game and the game you'd most like to see in real life. Speedball is a brutal future sport where the object is to score goals. There are no rules. The ball can be kicked, any kind of violence is acceptable including kicks, punches and body slams and performance enhancing gadgets are perfectly legal. This game is played in arenas, not just in pre-set arenas, but also those that you make. The controls are very simple, you move the player toward the ball and if he's holding it pressing the button will make him pass while a quick tap in a shot. Goals appear on the sides of the arena, and when collected can cause the other team to be penalized for several seconds, or simultaneously hit over. There are also two obstacles on the walls at the side of the arena. Hit the ball into a door-murder and any subsequent goals will be worth 50% more, while hitting a power goal obviously changes the ball so it kills the opponents it hits.

The game can either be played as a knock-out tournament or a league. The latter requires you to put your management cap on as you choose your team, buy new players and decide what equipment you want to spend your money on. In fact it's a fantastic place to try. Speedball 2 also boasts great graphics and fantastic sound effects and music. This isn't just the best Amiga sport game, it's one of the best Amiga games.

▲ PRO TENNIS TOUR 2 **USI** £49.99

The only true normal, untopping/tops take to tennis courts is during the two real matches, each with which the scoring is gripped with Wimbledon fever. But when you relax with family about on a weekend lawn, what's really this could really dig out your skills and try your hand at an altogether more serious version of the sport, Pro Tennis Tour 2 takes you to some of the world's top tournaments where you can try your hand at leading some of the top players. All court preferences are catered for, with grass, clay and hardcourt available at the start of a match.

Playing a shot is a dead simple. Provided you steer your player into the right position, pressing the start the ball swinging then moving the joystick determines what type of shot is played. All the strokes you'll expect to see at Wimbledon are included (except the flimsy one where they hit the ball between their legs) such as tops, crosses and smashes. Like the real thing, being a specialist is simply return a shot or catch your opponent whilst faded on the wrong side of the court. You can also play from the baseline or up against the net, where the shots change to those appropriate to the position.

Very low and very easy to get into, it's missing any hidden gems and simple about. A lot cheaper, and easier, than spending 30 hours to get a real on the center court.

■ TENNIS **Domark** £39.99

While the American baseball world series only consists of Canada and the States, so Brits can now take a crack at entering the hot or flame in the superb game from Canada.

Life actually stands for this British hit, and that's the aim of the game. A baseball match is divided into nine innings, which are split into two halves. The first two hours begin with introducing, and all you've got to do is to play the ball out of the park, or hit which is where you just tap the ball to fly and catch the fielders all around. When there's a runner on a base you get to determine when, if at all, he should fly and steal the next one. Other than that this is just batting. The close fielding, so many fly and missing three times means you're out, as those being caught. It's also nice to note that the computer players do make mistakes, and our best pitches lead to a walk, where the player gets to move one base along without the risk of a ball being hit.

While three batsmen are not play enough and it's your turn to pitch. After making this game so good is that the programmers have done only with most of the game and spend for another week run. The graphics are large and really animated and the game plays exceptionally well.

And They're On The Final Bend...

CYBERBALL Rampage 29.99

Ever wanted to know what American football will look like in 100 years time? Well, you actually get to play it in Cyberball.

Game are the human players, and so come the robots. It hasn't made up from several different kinds, each with different rules such as blocking or kicking. To make the game up to 100 the last rule applies if it doesn't work or someone either is set time. This can be turned to your advantage by throwing for an opponent just as it's about to go long.

Although Cyberball is a little rough around the edges, it's playable all the time. It's a futuristic football you're after, though, look elsewhere.

LEADS 25 Gold £39.99

The golf game started 30 years ago when it was first released, although it failed to make the game popular on the home.

It's probably not in its quest, it can't last enough. The graphics are all in field mode and look fantastic, and it's this which does it up. Apart from that, though, what has it kept simple, you know where the club system and plenty of features.

If you're not enough of PGA Tour Golf, give this a look, but it's also after your first golf game that can't be played to start.

BUDGET TITLES

Ever since Mastertronic announced that they were going to release great quality games at an affordable price, the budget software market has never stopped expanding. Most of the stuff you can get now is re-released classics of a year ago, so if you're looking for a cheap way to boost your software collection, this is the place to look. Here's a quick run down of some of the best available.

LOTUS ESPRIT TURBO CHALLENGE

GBN £9.99

The original of action-racing games that, it can't really, but it's still great fun, even with two other Lotus games available. Forget oil-fans of course and all kinds of weather conditions. This is just straightforward racing while controlling in a league table with 16 other drivers. It's fast and very playable, although there are one or two playing glitches, such as the fact that your car stops dead if it hits something else. Other than that, you'll be a long way out, especially at this price.

I, A-B INTERCEPTOR Electronic Arts £10.99

It was a stunning sight when it appeared in the early days, and its software now. Although quite basic in approach in some of the later simulations, there's nothing like it for speed in racing. Just working that map seems to turn it over all over of the west coast of the US, right down to a full screen view of your craft is stunning. This was the first one to feature external views, and still ranks as one of the most addictive sims ever seen. Cheap to own the price.

Team Intrigue, Team Intrigue is a new fast and enjoyable title.

PRINCE OF PERSIA TEAM INTRIGUE GBN £9.99

Respray £9.99

The ultimate graphic adventure, and now available for under a tenner! There can't be many games that have this standard of animation. The game at first is a real treat, but it's worth spending the money just to see the main character do a running jump. Classic stuff.

Queen's rule-of-the-art like racing game, and the only one to realistically portray being - running off the nose of the helicopter. It's surprisingly realistic, having all the realistic objects in place, the game is fast and very smooth, with some of the most looking of any. Progression? Well, there's only a dozen tracks and three engine tests to play with, but after a while it all gets a bit boring. A lot of fun to drive, though, but a shame it doesn't have a bit of action.

PAIRO Arden 16 £9.99

A classic old arcade game, reworked by Ocean France to huge acclaim. A simple idea, looking good-looking before they launch it in the rest of a ground based simulator, the Arden simulation needs lightning reflexes to play, so it's not as well that the controls are as good as they are. Slightly better than Benchmarking (Up & Down) but as good as the arcade version.

SOX GBN £9.99

Not quite as efficient as the old product to win control, but the Sox '90s up Competition 90 is still a handy title package to have. For control, you can build an entire stand-alone (looking good) game with as many balls and wheels as you require. All it does is a simple performance, but out in a logical and straightforward way. Simple graphics, design looking, before player interaction, define levels and then add all the attack tactics. It has some good ideas, and they show off quite reasonably what the game does. You'll have to create another '90s with it, but you'll definitely be able to break out something to impress your friends.

 11/11/2001 11:11 AM

A blank sheet of lined paper with horizontal ruling lines and vertical margin lines.

1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 26

[illegible]

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing data sets.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. After analysis, the next step is to develop a solution or plan. This involves identifying the most effective and efficient way to address the problem.

5. Finally, the solution is implemented and monitored. This involves putting the plan into action and tracking its progress to ensure it is effective and efficient.

Information systems support business processes - effectively, efficiently - support all business activities within the organization and its external environment

There are a number of ways to make a good impression on your audience:

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
